

【Greenhouse gas emissions by category - Track record】

※Calculation period: January to December, 2025

Scope	Category	Item	FY2023
2*1	-	Indirect emissions from energy/utilities	46.773
3*2	5	Waste generated in operations	0.948
Total of Scope 2 - 3		-	47.721

Emission intensity : Scope 2(t-CO2)、Scope 3(t-CO2e)

*1 The calculations were based on the base emission factor in the "Emission factor by electric power supplier (for calculation of greenhouse gas emissions of specific emitters)", published by the Ministry of the Environment of Japan, and the Ministry of Economy, Trade and Industry in 12/22/2023.

*2 The calculations were based on the "List of calculation methods and emission factors in the calculation/reporting/publication system" and "Emission intensity unit database for calculating greenhouse gas emissions of organizations through supply chain(Ver.2.5)", published by the Ministry of the Environment of Japan.
